

STONY PLAIN SUN.

VOLUME 3.

STONY PLAIN, ALBERTA, THURSDAY, APRIL 5, 1923.

WHOLE NUMBER 140

Farmers,

Don't Wait until spring work starts. Bring in your **BROKEN CASTINGS** and get them welded. If too **BAD** for repair, I will tell you. All work carries my **GUARANTEE**.

If your **CAR, GASOLINE ENGINE, TRACTOR, MAGNETO or BATTERY** need attention I will quote you a price on the work which I know will be satisfactory. Price and work **GUARANTEED**.

T. A. Bonser, The New Garage.

The Event of the Season.

The long-looked-for double-wedding event at Rosenthal took place on Monday last, when the two daughters, Julia and Lena, of Mr. and Mrs. Martin Kotscherofsky were united in marriage to two local men, by the Rev. Mr. Poetsch, pastor of the Lutheran church near Spruce Grove.

Mr. Gust Zucht, the popular young business man of Stony Plain was married to Miss Lena, and Mr. Peter Kulak, son of Val. Kulak, a life long resident of Rosenthal, was married to Miss Julia.

Great preparations had been made for the event, and the entire proceedings were a great success, and large numbers of friends of the three families were present to tender congratulations. The Mayor of Stony and a number of the other good people from town graced the occasion with their presence. The home of the brides and Mr. Kulak Sr.'s residence were requisitioned, to accommodate the big crowd which attended. After the ceremonies, the two happy couples left on their honeymoon trip to the city.

A Tip for Stonyites.

There was a fire at Alliance last Thursday, the third big one this year. One store suffered a loss of \$21,000. The closing sentences of the dispatch should interest our villagers:

"It was only due to the absence of wind that the fire was kept from destroying the entire village."

"The village of Alliance is very much in need of a fire brigade, and necessary equipment and unless such a need is supplied serious consequences are feared."

Heard on Main Street.

"Hello, Dick, didn't you get any presents for Easter?"

"No, but a dog."

The Sun Letter Box.

The Editor does not accept responsibility for opinions expressed in this column.

Editor Stony Plain Sun:

DEAR SIR: I noted with interest and much pleasure the article in The Sun of a recent issue with regards to the all-absorbing money question and the scarcity of this much-needed commodity at the present time. We all know—that is, those who read the papers, or any papers—with intelligence, that the great trouble just now is the lack of money with which to buy those things which the farmers raise and have for sale. Consequently, when there is no demand for farmers' produce, cattle, etc., the prices on these are depressed and go down, leaving the farmer at a loss to carry on business with any show of making a profit.

To alleviate this condition, temporarily, the great remedy is a supply of money to meet present requirements. One half has not been told of how farmers are being pressed just now by those who have made them loans in the past and are squeezing them now to extract the last cent. All this could be alleviated by an issue of bank bills from an institution guaranteed by the Provincial Government, the latter seeing only those who really needed the money on their farms received a supply of these much sought for bills. By all means let us have a Provincial Bank, and the time to establish it is at the present session of the Legislature. Apologising for having taken up so much of your space, I remain, yours,

U. F. MANN.

Stony Plain, Mar. 21, 1923.

LOCAL NEWS.

Miss Lalonde and Miss McLeod left on Friday to spend the vacation with friends.

Miss Mary Miller, Edmonton, spent the holidays with her parents in Stony Plain.

Mr. and Mrs. Bartholomew, of Edmonton; Messrs. Arthur and Walter Graden, Edmonton, and a large delegation from Rabbit Hills arrived in town on Monday to be present at the big wedding.

Mr. R. Heichen returned Saturday from a four-months' trip thru British Columbia.

Following the splendid success achieved on Wednesday evening last, the company presenting "The Young Village Doctor" will give another show in the course of 2 or 3 weeks.

Mr. John Shearer has sold his house on Fourth street to Mr. Gus Zucht.

On Thursday, March 29, to Mr. and Mrs. M. Zucht, a son.

Mr. Otto Oppertbauer has been laid up with an attack of the "flue."

Easter services were held in Stony Plain Methodist Church at 11 a. m. Sunday last; the special song service, being a feature of the occasion.

Last of the season hockey game was played on Friday last on the C. N. R. rink, the Doo dads beating the Rest-eases by 11 goals to 8.

A very good article on Debentures for Inga Municipal District appears on page 6. Those wishing to answer this letter will be given space in The Sun's columns.

Johnny Miller's Radiophony was crowded Thursday night when the big national hockey game was being played in Vancouver between the Eskimos and Ottawas. The reports came clear, and gave great satisfaction to the assembled sports.

United Farmer local meets on Saturday afternoon next, April 7, at the Royal Hotel. Final arrangements for the forthcoming affair on April 13 will be made. The committee at present having the box social and dance in hand are Messrs. Zilliox and Klapper.

The meeting of Inga councillors took place on Tuesday last, instead of Friday the 6th. Most of the councillors were present, several having got wise to the change of date. The meeting took place at the one store town, Carvel.

Be Prepared.

A big box social and dance is billed to take place in Stony on the evening of Friday, April 13, under the auspices of the U. F. A. Local. This should be well attended, as it is some time since one of these popular events has taken place locally.

A Disappointing Announcement

Mr. Charles Stewart has made his long and eagerly awaited statement to Parliament outlining the immigration policy of the Dominion Government. That statement has, however, signally failed to arouse any enthusiasm either in Parliament or throughout the country; in fact, taken on the whole, it has proved a grievous disappointment to all who were expecting real action in regard to this subject which is admittedly of such vital importance to the future development and prosperity of Canada.

The lengthy delays before the Minister's announcement had given rise to strong hopes that a far-reaching and comprehensive immigration policy was being evolved. These hopes have been dashed, because there is nothing new, original or vigorous in the plans laid before Parliament; on the contrary, the policy outlined is so timid, and so palpably follows the line of least resistance, that it has called forth strong criticism from even the staunchest of Liberal newspapers and outspoken opposition from Government supporters in the Commons.

No one will attempt to deny the truth of Mr. Stewart's statement that anyone who could formulate an immigration policy for Canada that would be satisfactory to all people would need to be a second Moses. Mr. Stewart talks optimistically of securing 200,000 immigrants for Canada this year, but if that number is achieved it will be, not because of the Government's plans, but in spite of them and because people cannot be wholly kept away from Canada.

And, after all, what are 200,000 new settlers in a country of Canada's immense area and almost incalculable wealth of undeveloped natural resources, and which is now about the least thickly populated country in the world? Two hundred thousand additional people can be absorbed in Canada almost without being noticed, especially as it is an admitted fact that this Dominion loses tens of thousands of people annually to the United States. This Dominion should aim at receiving 200,000 from the British Isles alone, and as many more from all other countries combined.

At a time when Australia is getting thousands of British settlers under the Empire Settlement scheme, the Canadian Government hesitates to adopt a really effective policy whereby this Dominion would receive its full share of immigrants from the Old Country. Instead, the Government seems to place its chief reliance in the Canada Colonization Association. Granted that the Government should utilize to full advantage any and all reputable agencies for the obtaining of settlers, such as the Association referred to, the C.P.R., Canadian National Railway, and the Empire Settlement scheme, these should be but auxiliaries to the main Government effort.

Apparently the short-sighted attitude adopted by the leaders of organized labor on the question of immigration is largely responsible for the weak-kneed attitude of the Government. Labor, as has been repeatedly pointed out in this column, is standing in its own light. No sane Canadian desires to see wages reduced in Canada below that which will guarantee to the worker not merely a decent but a good standard of living, but the fact remains that the average Canadian is not prepared to do the "rough" work which is required to be done in order that raw materials and means of transportation shall be available for our industries, and without such class of labor, Canada's resources must remain undeveloped and her industries languish.

Furthermore, just so long as this class of labor is lacking, and wages remain at or close to the peak reached during the abnormal war years, costs of production and transportation must remain so high that the average resident cannot afford to purchase as freely as he otherwise would. The inevitable result is decreased sales, smaller production, and unemployment, and the greater the unemployment, the smaller the sales and the lower the production. A return to more normal conditions—which a large volume of immigration would assist in bringing about—would mean an increase in the purchasing power of the dollar, and even with a somewhat lower wage, the workman would find himself better off, purchases would increase, industry revive, and employment become more general. But organized labor persistently refuses to recognize these economic truths, and deliberately closes its eyes to the fact that there is ever a point where high costs of production operate to curtail and even altogether stop production, which means unemployment. Surely it would be better to have all employed at a reasonable wage, than to have some workmen employed at exceptionally high wages in limited production and others in idleness because work cannot be obtained.

Nevertheless, the advocates of this shortsighted view appear to have the ear of the Government, thus bringing economic losses not alone on themselves but the whole country. The only bright spot in this immigration muddle at Ottawa is the unofficial announcement that a separate Department of Immigration is to be created, because it is only human nature that anyone appointed to that portfolio will be anxious to show results and justify his appointment. Perhaps, then, some life will be breathed into the dead bones of our national business of obtaining more, and many more people for this thinly populated Dominion.

Eczema Covered Arms of This Healthy Child

Mrs. Alex. Marshall, Sprucedale, Ont., writes—

Baby Marshall.

DR. CHASE'S OINTMENT

60 cents a box, all dealers or Edmanston, Bates & Co., Ltd., Toronto.

"When my little son was three months old he broke out in sores on his chest and arms. We did all we could to heal these terrible sores, but nothing did him much good. Finally I ventured on a box of Dr. Chase's Ointment and kept on using it. At last we were rewarded by the steady healing of the sores, and finally he was completely relieved of them. He is now three years old, and has had no return of the trouble since."

Household Hints

Valuable Recipes For the Busy Housewife

Forecast Rhubarb Pie

2 cups rhubarb, ¼ teaspoon salt.
1 cup sugar, ¼ teaspoon nutmeg.
2 ½ tablespoons Sun-Maid seedless raisins.

¼ cup very fine bread crumbs.

Pastry for 2 crusts.

Cut rhubarb in ½ inch pieces, scald with boiling water, drain and mix with other ingredients in order given. Place in a pie pan lined with pastry, cover with upper crust and bake in hot oven about 20 minutes or until brown, reduce heat and cook 15 minutes longer.

Sugar Cookies

¼ cup butter, ½ teaspoon salt.
1 cup sugar, 1 tablespoon milk.
2 cups flour, grated rind 1 orange.
1 cup chopped Sun-Maid raisins.

2 eggs, 2 teaspoons baking powder. Cream butter and add sugar slowly, creaming them together. Add well beaten eggs. Sift flour, baking powder and salt together and add to egg mixture. Add milk, flavoring and raisins. If dough is not stiff enough to roll, add more flour. Turn out on floured board and roll thin. Cut in fancy shapes and bake in hot oven 10 to 15 minutes. This makes about 36 cookies.

Medical Men to Meet

Over one thousand members of the profession are expected to attend the annual meeting of the Canadian Medical Association, to be held in Montreal in June. A number of the most distinguished surgeons from Great Britain, the United States and Canada are to be present.

CAN THE DEAF BE MADE TO HEAR?

This question can be answered both ways. If the deafness is due to Catarrh, success is general if the sufferer persists in the use of Catarrhophone, and thereby cleanses the ear of the system. Penetrating through the passages of the ear, the soothing vapor of Catarrhophone relieves the inflammation, destroys the seeds of Catarrh and thereby allows nature to reassert herself. Deafness, pain over the eyes, plugged nostrils and other symptoms associated with Catarrh, and Catarrhophone. You'll be more than pleased with the quick improvement in your condition. Two months' treatment. One Catarrhophone sold everywhere, or the Catarrhophone Co., Montreal.

An edition of the New Testament ¼ inch by a little over ¼ inch, and ¼ inch thick, is in the Congressional Library at Washington.

BABY'S HEALTH IN THE SPRING

The Spring is a time of anxiety to mothers who have little ones in the house. Conditions make it necessary to keep the baby indoors. He is often confined to overcrowded, badly ventilated rooms and catches colds which rack his whole system. To guard against this a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. This will prevent colds, constipation or colic and keep baby well. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wonderful Muscular Power

Jewish Athlete Proves that He Can Bite Through Steel

That a Jewish athlete named Breitbart, 34 years old, 5 ft. 2 in. in height, and weighing 210 lbs., can bite through steel is vouched for by a medical correspondent of the Lancet.

Breitbart's performances astounded a committee of physicians, engineers, athletes and presidents of athletic corporations, who saw him sever with his teeth several iron and steel chains one-fifth of an inch thick; bend into a circle iron rods half an inch square, using his mouth as a fulcrum; bend over his head a rail four inches thick by two and a half inches.

The correspondent says: "The committee is satisfied that he accomplishes the tasks by means of extraordinary muscular power coupled with excellent scientific training and muscular energy."

Mazd's Liniment For Coughs & Colds

W. N. U. 1468

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher

In Use For Over 30 Years

THE CENTAUR COMPANY, NEW YORK CITY

No Entries for Soaring Flight

Now Making Light Engine for Use by Gliders

So far no entry has been registered for the British prize of \$5,000 for a soaring flight of fifty miles and expert opinion has been heard to express the view that it will not be possible to use gliders for travel across the country after the manner of the vulture and albatross. Attention is being turned to the possibilities of installing an engine of 20 horsepower in a glider and an aircraft company has produced a two cylinder air-cooled engine which weighs 85 pounds and develops 18 horsepower. An attempt is being made to interest pilots who cannot afford to keep a full-sized aeroplane in this new engine.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

B.C. Hen a Winner

Only One to Reach Coveted 200-Egg Mark

The only hen out of the total of 11,579 competing in the Record of Performance "A" during the year 1921-22 which reached the coveted 200-egg mark was a single-comb White Leghorn owned by the University of British Columbia. Of the 23,526 birds which have been entered in the contest since its inception in 1919, only two, including the one already referred to, have laid 200 eggs. The second bird was also a Leghorn and made its record in Ontario.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

And the man who is really and truly in love doesn't lie to the woman in the case.

Japan's Supply of Quicksilver

Japan will soon be independent of its supply of quicksilver. A rich vein, said to extend seven miles on the surface and to vary in width from two to six feet, has been discovered. The ore assays 18 per cent, and the vein increases in thickness the deeper it is followed.

Keep Them Growing

Children who are over-thin, listless or delicate, should take

Scott's Emulsion

regularly every day as an aid to growth and sturdiness.

Nothing surpasses Scott's Emulsion as a tonic-nutrient for a child of any age.

Scott & Bower, Toronto, Ont. 20-64

After EVERY Meal

give your digestion a "kick" with WRIGLEYS.

Sound teeth, a good appetite and proper digestion mean MUCH to your health.

WRIGLEY'S is a helper in all this work—a pleasant, beneficial pick-me-up.

CROWN BRAND CORN SYRUP

is one of those pure food products that is so good and popular that it is known and used from one end of Canada to the other.

"Crown Brand," the original Corn Syrup, is the favorite because of its flavour and unquestioned quality. Accept no substitutes.

THE CANADA STARCH CO. LIMITED

The Western Provinces Are Attracting Attention As A Field For Chemical Industries

The prairie provinces of Canada are classed primarily as agricultural areas and up to the present time they have not been considered seriously as probable contributors to the mineral wealth of the country. Recently, however, the resources of these provinces in non-metallic minerals, such as clays, coals, oil, gas and the sodium and magnesium salts, which occur in the numerous alkali lakes and sloughs throughout the area, have been attracting the attention of capital with the result that considerable activity is evidenced in all these lines.

The increased interest in the alkali deposits of Western Canada has induced the Mines Branch of the Department of Mines, Ottawa, to institute a detailed investigation of these deposits with a view to determining their possible economic value and the extent of reserves. The work has now been in progress under the direction of Mr. L. H. Cole during the last two field seasons.

Natural occurrences of soluble mineral salts are known in the provinces of Manitoba, Saskatchewan, Alberta, and British Columbia, either in the form of isolated deposits or as brines. Some are of considerable extent and are probably of sufficient size to warrant commercial exploitation, provided economical methods of recovery can be developed and sufficient markets can be established.

Three of these deposits are being operated, or will shortly be operated, in the prairie provinces and plans are under way for the development and operation of a fourth deposit.

At Tuna, Saskatchewan, a half million dollar plant is now being constructed to extract salt cake and other chemical products from the brines of Muski Lake, formerly Houghton Lake, 23 miles west of Humboldt, Sask. The company operating this deposit is The Sals and Chemicals, Ltd., controlled by Canadian and United States interests. The main plant of this company is at the deposit at the lake and they have a refining plant at Kitchener, Ontario. When this plant is in operation it is estimated that the output will be 30,000 tons of salt cake per year besides Epsom and other salts recovered as by-products. A small village has been erected at the lake with housing accommodation for 60 men. When the plant is working at full capacity 100 men are to be employed.

At Frederick Lake, five miles south-west of Dunkirk, Sask., and 38 miles from Moose Jaw, Sask., another salt cake recovery plant is being erected by The Bismarck and Leat Co. with head offices at Cincinnati, Ohio. This plant is practically completed and a capacity of fifty tons of salt cake per day, and as soon as it proves commercially successful, further units are to be added to increase the output to 200 per day. At the present time, twenty men are employed at this plant.

At a lake five miles north of Paddle River, Saskatchewan, an experimental plant has been operated by a company called Soda Deposits, Ltd., with head office at Calgary, Alberta. This deposit, although somewhat smaller than some of the other deposits, contains sodium sulphate in a very pure state and several shipments have already been made. This company hopes in the near future to be in a position to put its product regularly on the market.

In British Columbia, the Basque Chemical Co. is operating a series of five lakes situated fifteen miles west of Ashcroft, B.C. From these lakes they are excavating crude magnesium sulphate (Epsom salts) which is shipped to Vancouver where it is refined and sold as medicinal salts and to the tanning industry. Plans are now under way for greatly extending the development of this deposit.

In the vicinity of Meadow Lake, fifty miles south of Clinton, B.C., the Lithium Soda Co. is operating a sodium carbonate lake and shipping their product to Vancouver over the Pacific Great Eastern Railway. This material is being disposed of at the present time to the soap manufacturers of the Pacific coast, but they are under way to dry the material at the lake and increase the output.

W. N. U. 2466

"YOUR TEETH"

SCURVY AND THE TEETH

By Ben Proctor McGee, M.D., D.D.S., Pittsburgh, Pa.

The several main products which may be expected to be produced from these deposits are Glauber's salt, salt cake, Epsom salts, soda ash, and baking soda.

Sodium sulphate in the anhydrous form, more commonly known by its trade name of salt cake, finds its chief use in the manufacture of sulphate pulp, in metallurgical work in the refining of metals, in the manufacture of window, plate and bottle glass, and in making water-glass. In the hydrous form, it is marketed as Glauber's salt, and as such is used in tanning, in the textile industry as a mordant, and in medicine.

Hydrous magnesium sulphate or Epsom salts is largely used in the cotton trade for warp-sizing; it is also employed for medicinal and agricultural purposes, and in dyeing with aniline colors, since goods thus treated are found to withstand the action of soap better than those not so treated.

Sodium carbonate in the anhydrous form, known under the trade name of soda ash, is one of the principal forms in which sodium salts are used in the alkali industry, since it frequently forms the base from which other sodium compounds are made. It is used extensively in the manufacture of glass, soap and dyes, as well as in cleaning preparations, metallurgical processes and tanning. In the hydrous form it is marketed under the trade name of sal soda, washing soda or crystal carbonate and as such is used in softening water and to replace soda ash when purity is essential. Sodium bicarbonate or acid sodium carbonate, commonly known as baking soda, is generally marketed in a very pure form, and finds its principal use for making baking powder.

The operations of these companies tend to bring before the public the possibilities of the western provinces in the mineral field and should form the nucleus of the ever-increasing industry which in time should prove of great importance to the whole of Canada.

Many Prizes for Saskatchewan

From 1911 to 1922, Saskatchewan farmers have won 229 prizes for their grain, grasses and vegetables at International shows held in Canada and the United States. Of these a total of 34 were either sweepstakes or first prizes. In addition a large number of prizes have been won for livestock raised in the province, the exhibition of which has been a prominent feature at all the shows where they have been shown.

You can tell what a woman thinks of a man by what she says about him.

PROSPECTIVE CANADIANS ABOARD THE "MONTCALM"

Aboard the passengers on the Canadian Pacific liner Montcalm on her last westward passage across the Atlantic were sixty-three boys from the sheltering houses, Liverpool, who were en route to the Sheltering Home, Belleville. Every child was in possession of kit bags containing a splendid outfit for commencing their careers in the Dominion and, as will be seen from the photograph above, they were an exceptionally fine type of youngsters. Assimilation at their age being easy, they should prove a valuable asset to Canada's growing province. A party of Salvation Army workers were also aboard, of which 33 were destined for Western Canada, 22 for points in Ontario and 6 for the United States. There were over eight hundred passengers on-board.

Reaching The Apex In Quality And Production Of Western Spring Wheat

The Livestock Market

Keener Demand For Stockers, and Feeders

According to the Dominion Livestock Branch weekly market reports, young calves are not being liquidated to quite the same extent as they were in 1922. The report on March 8 from Toronto was that the demand for veal had lessened, and from Montreal, that the quantity of light unfinished calves on hand had lowered the prices of all grades.

The total sales of livestock this year up to date compared with the same period last year at the principal markets were reported as: 115,494 cattle against 92,532; 20,902 calves against 22,544; 209,164 hogs against 169,459; and 48,236 sheep against 45,825. It will be noticed that only calves show a decrease. Toronto on March 8 reported the sale of ten loads of the best feeding steers in anticipation of the new store cattle export trade at from \$6.75 to \$7 per hundred in the yards. Winnipeg reports a liberal enquiry for stockers and feeders at values listing up well in line with the preceding week. Edmonton reports a much keener demand for stockers and feeders.

Dairying in Alberta

Increased Value of the Butter Industry in the Province

Over fifteen million pounds of butter were manufactured in the province of Alberta during the past year, an increase of a million and a quarter pounds over the previous year. The selling value of the product last year was \$5,022,600, as against \$4,542,067 in 1921. An idea of the increased value of the butter industry in the province is shown by the fact that in 1912 there was \$23,300 worth of butter manufactured as compared with \$5,085,625 for the year just passed.

Hall Association Has Surplus

Presenting a financial statement showing a surplus of \$1,146,144 in all funds, the directors of the Saskatchewan Municipal Hall Association reported last year the most successful in the Association's history. Claims during 1922 were listed as \$357,084, as compared with \$1,762,886 during the preceding year.

Safe Is Off

The Flapper (to the young man being the counter): "What is the price of this pair of gloves?"

Frisk Clerk: "A kiss." The Flapper: "Very well, kindly give me three pails. I shall send my grandmother to pay you this afternoon."—Coblin.

"The Listener," in the Boston Transcript, tells anew the fascinating, the marvellous tale of the development of Marquis wheat, in these words:

"Constantly, in the United States, the winter wheat belt encroaches on the spring wheat belt. There is even an idea, at least among the winter wheat farmers, that spring wheat growing sooner or later comes to an end by the exhaustion of the soil, even where fertilizers are used. Some of the States, like Wisconsin, which were once spring wheat states, now produce scarcely any spring wheat.

"But the Canadians of the northwest who have started spring wheat cultivation to a more advanced point than people anywhere else, do not for a moment accept the notion. There is a wheat country. It is a crop that they must always depend mostly upon; and they are committed to spring wheat forever. They have done wonderful things with their wheat. They have (chiefly through the experiments of a family of men named Saunders—the father, Dr. William Saunders, and the sons, Charles E. and A. P., developed a particular kind of wheat which does an almost miraculous thing. To suit Canadian production, a wheat must do five things: It must be able to grow and ripen in less than 70 days. It must resist intense cold; it must be able to resist drought; it must have high milling and baking qualities, and it must produce a large quantity of grain to the acre. There were in existence, when the Saunders began experimenting in Ottawa, wheats which would do one or another of these things, but not one which would do them all. There was a kind of wheat which grew in Russia, called Ladoga, from the great far northern lake of that name, which would grow and ripen in the Arctic Circle. But it did not mill well nor make good bread—its bread was coarse and yellow—and it was a poor yielder. The Red Fife of the United States had excellent milling qualities, and was generally raised in Canada, but it was not quick enough for the Canadian summer. The Saunders' stunt was to keep the Ladoga earliness and unite it with the Red Fife quality. By careful plant breeding they accomplished this. Then the productiveness. For that, the Saunders employed an Indian wheat called Hard Red Calcutta, which was also drought resisting. And anyway, with one thing and another, they kept at work year after year, cross-breeding the strains, selecting grains, mixing one wheat merit with another wheat merit, until at last they had produced a wheat that will ripen in the short summer of the far north, will stand up against drought, will make excellent white bread, and will produce up to 55 bushels to the acre! And then, with true British respect for a noble pedigree, Mr. C. E. Saunders called his apex grain Marquis wheat, and presented it to his countrymen."

"It was a Royal gift. Royal? No king could have made it. It increased the productiveness of the Canadian prairies several fold. It was not merely making two blades of grass grow where one grew before—it was making about 50 bushels of perfect wheat grow where 25 of a poor quality grew before. It represented a conquest of cold and drought, an easing up of the conditions of farm life on the prairie, and a great extension of settlement. If probably, when history's account is made up, will be found to have added millions of men and women to the population of Canada who might otherwise not have been there or remained there. It is no wonder that Canadians are asking themselves what honor they can pay to the name of the Saunders who is gone, and to the personality of those who remain, which will be commensurate with the service rendered. The Dominion made C. E. Saunders her 'realist.' She, or Mother England, ought at least to make him a Marquis! The United States ought to join in the ordinary honor to him—it cannot give him any other title than possibly that of 'Colonel'—for the Marquis wheat is as available for production in the United States as it is in Canada, and now covers vast areas in the Dakotas and Minnesota."

Canadian National Road Shows Operating Surplus Of Four Million Dollars

Ottawa.—The Canadian National Railways closed the year 1922 with an operating surplus of four million dollars, but with a deficit, when fixed, and other charges are taken into account, of sixty millions. Such was the announcement of Hon. George P. Graham, Acting Minister of Railways, in making the annual statement on the National roads to the House of Commons.

Although the Grand Trunk has since been formally amalgamated with the Canadian National, Mr. Graham gave statements for the two systems separately—statements which showed that an operating deficit on the Canadian National was turned into an operating surplus by the Grand Trunk.

The Grand Trunk had an operating surplus of \$13,929,567; the Canadian National, namely the Canadian Northern, the I.C.R. and the G.T.P., an operating deficit of \$7,236,218. Taking one from the other, the National roads as a whole had an operating surplus for 1922 of \$4,193,592. Compared with the year previous, both systems showed considerable improvement. The operating deficit on the Canadian National was reduced by about six and a half millions and the operating surplus on the Grand Trunk was trebled.

Canadian lines were the only part of the Grand Trunk system to show an operating surplus in 1922; last year, the New England lines were the only part of the Grand Trunk system to show an operating deficit. The western lines and the Central Vermont both converted an operating deficit into an operating surplus.

Deductions for taxes and other items brought the operating surplus of \$4,193,592 for the amalgamated roads down to \$2,962,782. Deducting this from fixed charges, amounting to \$62,454,627, the total deficit for 1922 is shown to be \$59,251,845. This is an improvement of \$12,410,433 over the deficit for the year previous.

Farmers Paying Income Tax

More than One-Third Were Resident in Saskatchewan

Ottawa.—Nearly four thousand persons designated as farmers, ranchers and fruit growers in Canada were registered as shareholders in Canadian chartered banks in 1922, according to a report brought down by the Minister of Finance. The number of farmer shareholders by provinces was as follows: Alberta, 216; British Columbia, 93; Manitoba, 330; New Brunswick, 46; Nova Scotia, 215; Ontario, 1,188; Prince Edward Island, 28; Quebec, 465; and Saskatchewan, 747.

A total of 18,753 farmers paid income tax to the Federal Treasury in the year 1922, and of all the provinces Saskatchewan last year had the greatest number with a total of 6,569. Ontario came next with 6,128 and Manitoba third with 3,458. The total for the other provinces were: Alberta, 1,638; British Columbia, 640; New Brunswick, 48; Nova Scotia, 193; Prince Edward Island, 49; Quebec, 150; and Yukon, 3.

Turks' Educational Orders
Constantinople.—Pursuing a policy of nationalism, the Ankara government has decreed that Turkish history, geography and language shall be taught in the Turkish language in all foreign schools in Turkey.

Moore Jaw Bye-Election
Moore Jaw.—Hon. W. E. Knowles, Liberal, and E. N. Hopkins, Progressive, were nominated to contest the bye-election for Moore Jaw constituency April 10.

EXPERIMENT WITH WESTERN COAL

EDMONTON AND TORONTO PAPERS CO-OPERATE IN ALBERTA COAL PROJECT

Toronto.—An experiment with a view to determining whether the vast coal resources of Alberta are available for practical use in relieving the fuel situation in Ontario now and in the future, is being conducted by the Toronto Star in co-operation with the Edmonton Journal. The latter newspaper is sending each a car of coal from the mines of Alberta.

At the same time the Provincial Coal Commissioner of Alberta and other experts are coming east to conduct a series of experiments in the western product in various types of furnaces in Toronto and elsewhere. When the "burn quality" of the coal is determined there will still remain the question of price, including the cost of transportation.

Have Hopes That Germany May Yield

French Premier Tells of Progress Made in Ruhr Invasion

Paris.—Premier Poincaré, appearing before the Finance Committee of the Chamber of Deputies to give an account of the situation in the Ruhr, said he had great hope that Germany would yield "by the end of May."

The Premier had with him figures giving the amount of coal and coke shipped from the occupied districts, but demanded from the deputies a formal engagement not to divulge such figures as he would announce. The Socialist Deputy, Herriot, whom Premier Poincaré recently termed "an abominable scoundrel" during a heated debate in the Chamber, refused to pledge himself to secrecy, so the Premier withdrew the figures.

M. Poincaré, according to the report, said that the great German manufacturers, who were the soul of German resistance, had tried on several occasions to open direct negotiations with the French Government. The latter, however, would only listen to official propositions from the German Government. The abandonment of Essen, for example, could be considered only when the entire settlement of reparations had been effected. The Premier indicated that the railroad in French hands constituted the best of guarantees.

Argentina Would Arbitrate Debt

British Loan Credited at Par Instead of Current Exchange Rate

Buenos Aires.—Arbitration of the differences between Argentina and Great Britain over the payment by the British of \$50,000,000 to Argentina, in January, 1921, is proposed in the report of Attorney-General Laffari, who was entrusted with investigation of British claims involving the sum of 3,000,000 pesos.

The British advanced the \$50,000,000 to enable Argentina to liquidate a previous loan from United States bankers, on the understanding that it was to be applied against the British credit established in Argentina during the war. Argentina credited the money at par, whereas, the British contend that it should have been credited at the current rate of exchange on New York.

Canada Curing U.S. Bacon
Ottawa.—More than \$20,000,000 pounds of American bacon sides have been imported into Canada from the United States, cured here and then shipped to England within the last four years. This information was given the House of Commons by Hon. Jacques Bureau, Minister of Customs.

New Dairy Land Discovered
Melbourne.—A quarter of a million acres of new dairy country, capable of maintaining hundreds of families, have been discovered in the Eastern Gippsland district in the State of Victoria.

Prince Thrown at Water Jump

Escaped Injury at Races When Horse Bailed

London.—The Prince of Wales was thrown at a water jump in the army point-to-point races at Abberford, but was unhurt.

The Prince was riding Prince Henry's horse and took the water jump in splendid style on the first round, but the second time the horse balked at the bank and plunged straight into the water, which is several feet deep.

The Prince was thrown into the boughs of a willow tree on the opposite bank but scrambled back to rescue his horse, which was plunging about up to its neck and rapidly sinking in the mud. The Prince, unaided, pluckily seized the horse's head and brought the animal out amid the cheers of hundreds of spectators.

Greeks Challenge to Angora Government

Demand Ships to Take Turkish Population From Greece

London.—The Greek Government has announced its policy on the refugee question, says an Athens despatch to the Times. This policy is a direct challenge to the Turks, demanding that the Angora Government send ships to transport the Turkish populations from Greece and declaring that it is absolutely impossible for Greece to receive more refugees until an exchange of populations is arranged whereby the Turks now residing in Greece will cede their homes to an equal number of Anatolian Greeks.

Record Fur Catch

Reports Indicate that Indian Trappers Had Good Season

Regina.—Statistics on the fur production of the various Indian reserves in Saskatchewan, Manitoba and Alberta, will be available shortly. W. M. Graham, Indian Commissioner for the Prairie Provinces, has just sent a questionnaire to Indian agents in this regard. Particulars concerning the sale of domestic animals during 1922 is also requested.

Tentative reports already received, Mr. Graham states, indicate that the trappers' catch for the winter of 1922-23 will be almost, if not quite, the largest on record.

Keep Your Hands Soft and White With Cuticura

The daily use of the Soap, with occasional touches of the Ointment, is very effective for keeping the hands soft and smooth. For red, rough or sore hands: On retiring wash with hot water and Cuticura Soap, dry, and rub in Cuticura Ointment. See 25c Ointment and 10c Soap Sold throughout the Dominion. Canadian Depot: London, Limited, 243 St. Paul St., W., Montreal. "Cuticura Soap" without name.

Want To Put Men On The Land Where They Can Make Good

MANITOBA REFERENDUM

TWO VOTES ON LIQUOR ISSUE WILL BE TAKEN

Winnipeg.—The people of Manitoba will be asked to vote not only on the bill of the Moderation League for the establishment of Government stores for the sale of liquor for beverage purposes, but on the petition of the Beer and Wine League for the sale of beer and wine with meals in hotels, and separate referenda will be taken according to a decision reached in the Legislature.

While there was a strong effort, initiated by Attorney-General R. W. Craig, for simultaneous plebiscites on both proposals, the House decided by the casting vote of Mr. Speaker (Hon. P. A. Talbot) to take two distinct votes.

There will thus be a referendum on the Moderation League's bill June 1, according to previous announcement by the Government, and another referendum on the Beer and Wine League's petition on a subsequent date.

HUSBAND DIDN'T DARE

LEAVE HER ALONE HEART WAS SO BAD

Those feelings of faintness, those dizzy spells, the all-gone sinking sensations which come on from time to time indicate a weakened condition of the heart and a disordered state of the nerves.

MILBURN'S HEART AND NERVE PILLS

have no equal as a remedy to strengthen the heart, invigorate the nerves and build up the run-down system. Mrs. C. Vanhorn, Eckville, Alta., writes:—"About a year ago I had a terrible nervous breakdown. My husband didn't dare leave me alone, and often had to stay up at night with me. I would just get three boxes; I took them and felt much better. I would soon be back to my heart. Someone told me about Milburn's Heart and Nerve Pills, got three boxes; I took them and felt much better, so continued all winter, and now I never feel any faintness. I surely do appreciate the good they have done for me."

Price 50c a box at all dealers or mailed on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Hamburg Regains Pre-War Position

Port Handles More Tonnage Than Antwerp or Rotterdam

Berlin.—Hamburg has regained her pre-war position as the greatest centre on the European continent. Statistics show that the port handled last year more than 12,000,000 net tons as compared with 12,750,000 for Antwerp, and 12,250,000 for Rotterdam. The German lines where operations before the war accounted for 67 per cent. of Hamburg's traffic, now handle only 29 per cent., being second to the British, whose percentage is 34. The Dutch are third and the United States fourth.

Fight in Tokio Assembly

Tokio.—The diet was prorogued in the midst of a free fight precipitated by a motion of the opposition to impeach the Government. Trays and inkstands were flying through the air when in the small hours of the morning the speaker declared the session closed.

Lady Carnarvon Reaches Cairo
Cairo, Egypt.—Lady Carnarvon has arrived here, ending her hurried trip from England, which she made partly by aeroplane, to be with her husband, who is ill with blood poisoning from an insect bite. Lord Carnarvon is much improved.

Ex-Kaiser's Wife Visits Germany
London.—Princess Hermine, wife of the former German Emperor, according to dispatch to the Times from The Hague, has gone to Germany; she will remain in that country for two months.

Ottawa.—"It is unfair to suggest that this is a real estate scheme to benefit the directors," declared M. A. Brown, representing the Canada Colonization Association to a committee of the House of Commons.

"It is not a real estate scheme and we were careful to see that no man interested in real estate was admitted to the board," he continued.

"The association is formed on a non-profit making basis, the price of land is fixed by government valuations, the rate of commission is fixed and every dollar we get goes back into immigration activities. The books of the company will be open to the Government all the time."

"Why did Sir John Willison resign?" asked H. Marler, of Montreal. "The first reason was that he could not give his time," answered Mr. Brown. "He also refused to go out and get money, taking the ground that money subscribed should be paid up. Some of the subscribers were not paying up."

"The vacant land in the west must be sold to settlers. If Canada was ever to be relieved of her financial burden, said Mr. Brown. The association proposed to establish sales agencies throughout the world and the agents would be paid on a five per cent. basis for the results they achieved."

"The first and last consideration is the settler," declared Mr. Brown. "We want to put men on land where they can make good. At present there are 15 settlers leaving Canada against one coming in."

"Why are people leaving the prairies?" asked F. Cahill, member for Pontiac.

Mr. Brown replied that in boom times many farmers in the west bought too much land, automobiles, etc., and now found they were carrying too much overhead. When they could not carry on they had to leave. The total commission charged was 10 per cent. Of this, five per cent. went to the agent abroad, 2½ per cent. to the local agent who showed the land and 2½ per cent. to pay overhead of the association. The reason that Government aid was necessary was because the 2½ per cent. would not nearly meet overhead.

Australia Discards Warcraft

Melbourne.—Twenty-four units of the Australian navy are to be disposed of, according to an announcement by the director of naval intelligence. The vessels include the battle cruiser Australia, light cruiser Sydney and a number of destroyers and sloops, as well as six submarines.

Patronize your local merchant and thereby help to build up your home town and community.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly the burning, itching, then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the nail, without soreness or irritation.

Against R. M. Debentures.

The following letter has been received for publication; it's a copy of a letter Mr Best sent to an Inga M.D. ratepayer, as a reply to one received—

Replying to your letter re debentures, I would like to state a few facts—Personally I would not be adverse to the M. D. going into debt, up to the neck, if it was not for the example of the cities, towns, villages, as well as many M. D.s and the Provincial and Dominion governments.

Practically all of these are struggling in deep water, seemingly with no immediate prospect of being able to pay their interest charges in full, apart from principal.

If the theory was a sound one—that, as a result of these expenditures, their villages, cities, etc., would be prosperous, then something has gone wrong with the works, and neither roads, bridges, side-walks nor even railways have brought the expected large profits in the way of more settlers, and more contented and prosperous people, but instead of that there seems to be a stream of people leaving the country rather than stay and help to pay their share of the enormous debts that have piled up.

Debt seems to be an easy thing to get into, but a hard thing to get rid of.

Another consideration is that there are so many municipal districts who are hard up and unable to meet their regular payments that it might have some effect on the prices this M.D. would have to sell its bonds at.

They would have to pay a high rate of interest or possibly take \$25,000 for \$30,000 in bonds. This would not be a very good start—interest would have to be paid on the \$50,000 we did not get, and the principal would also have to be paid some day.

Where has all the big money gone that was spent on public improvements and railways? It does not seem to be left in this part of the country. Our big share of it seems to be the debts. Whoever got the money does not seem to have been anxious to stop here and help bear the burden of the debts.

All of the above is respectfully submitted for your due consideration before you join with those who think it wise to get \$30,000 on debentures. Some men think we had better go round the hills instead of going thru them, for a little time longer, even though we have first class machinery for spending money.

WM. BEST.

Flem Stirling Suicides.

General regret was expressed in town when the news reached here on Saturday morning of the death of "Flem" Stirling, one of the Pioneers of Stony Plain District. So far as known, the deceased was last seen alive when he paid a visit to Mr. Hodgson, a neighbor, a mile away. "Flem" had a large circle of acquaintance in the District, some of whom he met when in town on March 24, when he appeared to be in good health and the best of spirits. He was found dead in his shack Good Friday evening by Mr. Thos Fitzpatrick, who had been in the habit of paying deceased a neighborly visit every few days. Constable Shelton of Lac Ste Anne detachment was notified, and he and Coroner Wolochow, of Onoway conducted an investigation, after which the Doctor decided an inquest was unnecessary, it being "a case of suicide by shooting."

Laurel Stirling, a nephew of deceased, who lives in Heatherdown District, was notified and was present at the investigation, with the officials. Undertaker Gauntly of Onoway arranged for the funeral, which was attended by a large number of friends and acquaintances of the deceased.

Mike Smigelski Hurt.

A very serious accident happened last week in a saw-mill which was being operated north of Duffield, when young Mike Smigelski had his right hand amputated and lost his left arm above the elbow, by being drawn across the running saw.

First aid was given by a local man, after which the sufferer was hurried to an Edmonton hospital.

It appears that the mill had been in operation for some time without notifying the authorities; and, following the accident, the proprietors were fined for an infraction of the Workmen's Compensation Act, by Magistrate Barnsley Hughes, in the sum of \$150 and costs of the Court.

Dance of the Rifle Club.

The best dance of the season was the unqualified verdict of those who attended the Rifle Club affair, on Monday evening last. Everything tended to this effect, the weather being good, and the roads fairly passable. By an arrangement made, the Orchestra played at the Rosenthal wedding dance at Kotscherofskys till 8, coming to town and playing till 2:30 a.m. and then returning to the wedding dance. The dancers of the District turned out in large numbers, much to the gratification of the Rifle officials.

SPECIAL CLUBBING OFFER.

YOU GET THE AMOUNT OF THAT CHEQUE

We have made arrangements with the E. H. Hatch Co. Limited who publish the CANADIAN POWER FARMER whereby we are able to offer that farm magazine together with our own weekly at the one price for both papers.

The CANADIAN POWER FARMER is West and Canada's biggest farm monthly. It is now in its twentieth year which means that it is thoroughly established throughout the West. It deals with the mechanical side of the farm. Every issue is full of helpful hints and experiences on the operation of all kinds of farm machinery from a wash-machine to a tractor. Its editorial staff consists of men thoroughly familiar with every branch of farming both from the practical and theoretical standpoint. Every month the magazine publishes experiences sent in by readers. Many of these are short but findings that are real money savers to farmers.

This offer may be withdrawn at any time. Without doubt your intention is to renew for this week, then why not take advantage now. Your subscription to this weekly together with a year's subscription to the CANADIAN POWER FARMER for the same price as our own weekly alone. This is where you get the \$1.50.

Mail your cheque or drop into our office the first time you are in town.

Articles intended for insertion in The Sun must be in the office not later than 5 p. m. Monday, to insure insertion.

Miss Emelia Baron has resumed her duties at the local telephone exchange.

J. Davis, Edson, was visiting friends here over the week end.

Mr. G. Clarke of the Alberta University was visiting with J. H. Lory during the holidays.

Mr. Jake Schrumm has his Ford car on the market at present, as he intends paying a visit to friends in Seattle.

Saturday morning's 1 o'clock train for Vancouver went west about 8 o'clock.

Kelly wants butter and eggs—see advt.

Summer has come—Wong York had ice cream on the bill-of-fare Saturday last.

Mr. A. Eaton interviewed the Minister of Agriculture last week regarding the renting of the local Demonstration Farm for the forthcoming season. Mr. Eaton held a sale of his effects yesterday.

Mr. Charlton, the Provincial travelling sales agent for Henry Ford, was in Stony last week, and was greatly pleased with the size and appearance of Stony. Mr. Charlton expresses great faith in the car for which he is agent, and expects that Mr. John Miller, Stony's Ford Man, will make a record this season in supplying the needs of local farmers for this popular car.

The annual convention of the Educational Association of Alberta is being held in Edmonton this week, and most of the local teachers are in attendance; the schools being closed all week on consequence.

On Thursday a car of "Pembina Peerless" coal left Evansburg billed through to Premier Drury of Toronto. This coal is going east under the auspices of the Alberta provincial government and will be tested out in Ontario with the cooperation of the Ontario government to show the fuel value of the Alberta product.

Roy Sherman, Spruce Grove was under the Doctors care this week.

Mr. Washburn had a substitute auctioneer at his sale today for Mr. Barker, at Carvel. The latter intends quitting farming, and has rented his place. Mr. and Mrs. D. Barker intend leaving shortly on a visit with relatives at the Coast.

Young Mr. Adolph Kulak is appearing before Magistrate Primrose today, charged with an infraction of Edmonton's speed by-law on Tuesday last whilst driving his motor car along Jasper avenue.

Wm. Best on Thursday last took down a load of hogs from Gainford.

Duffield U. F. local last week shipped a mixed car of stock to the Edmonton Yards.

The big annual Stock Show and Sales are on in Calgary all this week.

Why not arrange a definite plan for your boy by securing an Educational or Life Career Policy from Lloyd E. Wood, of Crown Life Insurance Co? Ten cents a day would do it. 835-6 Taylor Block, Edmonton.

"The Village Doctor."

The play, "The Young Village Doctor," which was put on last Wednesday night in Ducholke's Hall, under the capable management of Mr. George E. Clarke, proved to be the best seen here in a long time.

Miss Robertson, as Mrs. Crane, was delightfully amusing; Mrs. D. McDonald took the part of Miss Crane very successfully. Mr. Clarke as the Village Doctor proved equal to "mixin' doses" or giving advice to the love sick Englishman, the Lawyer man or to the married man who "works his wife" as he would the horses on the farm. The entire caste of characters was so well presented by each one taking part, that it made the play a very enjoyable affair from start to finish. After the "Show" the members sat down to a little supper served behind the scenes.

First-aid to the Thirsty.

Answers to "Anxious Enquiries."

The Government Dispensary in Edmonton is located on the ground floor on Howard avenue, just off Jasper, in the building formerly occupied by the W. Ross Alger corporation, immediately behind the Bank of Toronto building.

Hours of sale will be from 9 a. m. to 4 p. m. week-days and till noon on Saturday.

Stony Plain and District.

Mr. Percy Falkner, Vermilion, was in Stony over the week end. Meridian Lodge held its regular monthly convale on Tuesday night.

Wong June celebrated his birthday on Tuesday last.

Will the gentlemen who took the green overcoat from the Monday night dance by mistake kindly return same to Mr. I. Fuhr.

An act has been passed to facilitate the borrowing of money by farmers for seed grain purposes. Under the act, money loaned by mortgages for seed grain in respect of land they already hold mortgages upon will form part of the debt secured by the original mortgage.

Inserted by Request.

Thomas A. Edison, the well-known inventor, in an interview at West Orange, N.J.: "Sober America! I'm for it by all means. I know prohibition is a failure in the cities, but when wood alcohol kills off all the old soaks, prohibition will have its day. The boys and girls of the next generation won't have any taste for the damned stuff."
